

C10QM

Cavli
C Series

Overview

C10QM is the series of LTE Cat 1 modules with 2G fall back supporting 3GPP release 10, designed for IoT and M2M applications. It has a compact LGA form factor which is pin compatible with C10GS LTE Cat 1 / Cat 4 module which allows flexible migration. C10QM supports in-built GNSS for precise and dependable positioning. C10QM also supports VoLTE and SMS over IMS/SG/CS and support a wide array of internet protocols and industry-standard interfaces.

They come in 3 region-specific models: C10QM-EA for the Europe and Asia market, C10QM-EAJ for the Europe Asia, Japan market and C10QM-NA for the North America market. With optional integrated eSIM powered by Cavli Hubble platform, it provides global connectivity that helps to further reduce the time to market. C10QM is ideal for IoT applications such as asset tracking, e-mobility, data loggers, fleet management and environmental monitoring.
