## 1. Scope

This specification shall cover the characteristics of the SMD ceramic resonator ZTTCR8.00MG for clock oscillation circuit such on DVD, CD-ROM, computer hard disk and other automation equipment.

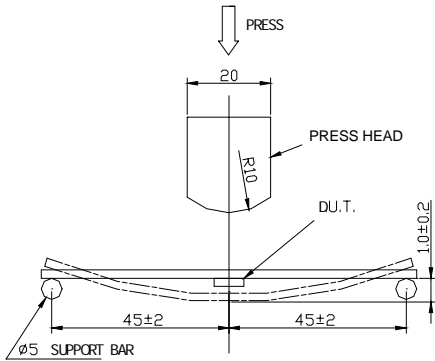

## 2. Specification no.: CQ2.882.122.18F.07

## 3. Part no.: ZTTCR8.00MG

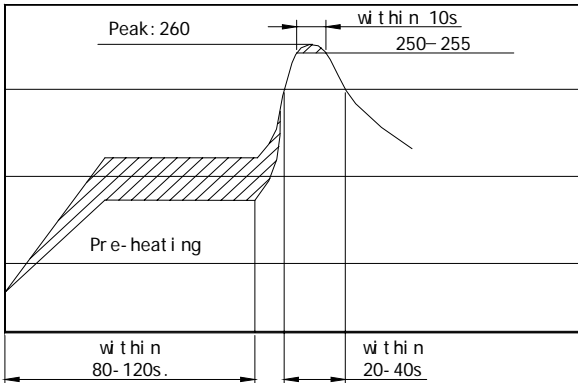

## 4. Electrical specification

|      |   |                            |
|------|---|----------------------------|
| 4-1  | Nominal oscillating frequency                                     | 8.00MHz                    |
| 4-2  | Initial tolerance   | ±0.50% max.                |
| 4-3  | Resonant impedance Ro   | 40Ω max.                   |
| 4-4  | Loading capacitance   | 15pF±20%                   |
| 4-5  | Insulation resistance   | 500MΩ min. (at 10V DC)     |
| 4-6  | Withstanding voltage  | DC 50V max. (1 minute)     |
| 4-7  | Rating voltage<br>- DC voltage<br>- AC voltage                    | 6V DC max.<br>15V p-p max. |
| 4-8  | Temperature coefficient of oscillating frequency (-25°C to +85°C) | ±0.3% max.                 |
| 4-9  | Operating temperature   | -25°C to +85°C             |
| 4-10 | Storage temperature   | -55°C to +85°C             |
| 4-11 | Aging (for 10 years)  | ±0.2% Max.                 |

## 5. Physical characteristics

|     | Test item            | Condition of test  | Performance requirement                                       |
|-----|----------------------|--|---|
| 5-1 | Random drop          | Resonator shall be measured after 3 random drops from the height of 1.0m on wooden floor.  | No visible damage and the measured values shall meet Table 1. |
| 5-2 | Vibration            | Resonator shall be measured after being applied with vibration (amplitude: 1.5mm, frequency: 10Hz to 55Hz) to each of the 3 perpendicular directions i.e. X, Y and Z for 2 hours.  | The measured values shall meet Table 1.                       |
| 5-3 | PCB bending strength | <p>With a glass-epoxy board (width=40mm, thickness=1.6mm. Then the board is bent to 1.0mm displacement and kept in this condition for 5 seconds (see below for details).</p>  | No visible damage and the measured values shall meet Table 1. |

|                                      | Test item                 | Condition of test  | Performance requirement                             |                                      |          |                    |
|--------------------------------------|---------------------------|--|---|--------------------------------------|----------|--------------------|
| 5-4                                  | Soldering heat resistance | <p><b><u>Temperature profile of reflow soldering</u></b><br/>The resonator shall be measured after being placed in room temperature for 1 hour.</p> <p>Tem ( )</p>   | The measured values shall meet Table 1.             |                                      |          |                    |
|                                      |                           | <p>Passed through the reflow oven under the following condition and left at room temperature for 1 hour before measurement.</p> <table><tr><th>Surface temperature of the substrate</th><th>Duration</th></tr><tr><td>Preheat: 150°C±5°C</td><td>60secs ± 10secs</td></tr><tr><td>Peak: 260°C±5°C</td><td>10secs ± 3secs</td></tr></table> |   | Surface temperature of the substrate | Duration | Preheat: 150°C±5°C |
| Surface temperature of the substrate | Duration                  |  |   |                                      |          |                    |
| Preheat: 150°C±5°C                   | 60secs ± 10secs           |  |   |                                      |          |                    |
| Peak: 260°C±5°C                      | 10secs ± 3secs            |  |   |                                      |          |                    |
| 5-6                                  | Solderability             | Dipped in 250°C±5°C solder bath for 3secs±0.5secs with rosin flux (25wt% ethanol solution).  | Terminals should be at least 95% covered by solder. |                                      |          |                    |

## 6. Environmental characteristics

|     | Test item        | Condition of test  | Performance requirement                 |
|-----|------------------|--|---|
| 6-1 | High temperature | After being placed in a chamber ( $+85^{\circ}\text{C} \pm 5^{\circ}\text{C}$ ) for 96 hours, the resonator is measured after being placed in room temperature for 1 hour.   | The measured values shall meet Table 1. |
| 6-2 | Low temperature  | After being placed in a chamber ( $-25^{\circ}\text{C} \pm 5^{\circ}\text{C}$ ) for 96 hours, the resonator is measured after being placed in room temperature for 1 hour.   | The measured values shall meet Table 1. |
| 6-3 | Humidity         | After being placed in a chamber with a humidity of 90% to 95% RH and a temperature of $+60^{\circ}\text{C} \pm 2^{\circ}\text{C}$ for 100 hours $\pm$ 4 hours, the resonator is measured after being placed in room temperature for 1 hour.  | The measured values shall meet Table 1. |
| 6-4 | Heat shock       | After being kept at room temperature, resonator shall be placed at a temperature of $-40^{\circ}\text{C}$ . After 30 minutes at this temperature, the resonator is placed at a temperature of $+85^{\circ}\text{C}$ . After another 30 minutes at this temperature, the resonator is placed under $-40^{\circ}\text{C}$ again. The above processes are counted as 1 cycle. There is a transfer time of 15 seconds between different temperatures. After 5 cycles, the resonator shall be measured after being placed in room temperature for 1 hour. | The measured values shall meet Table 1. |

|            |               |

**Table 1**

| Measurements                 | Requirements                                  |
|------------------------------|---|
| Oscillating frequency change | $\pm 0.3\%$ max. (refer to the initial value) |
| Resonant impedance change    | 40 $\Omega$ max.                              |

7. Test circuit & loop gain measuring circuit

- 7-1 Oscillating frequency : See Figure 2. Please note that the ZTTCR Series can oscillate normally even terminal (1) and (3) is connected reversibly
- 7-2 Equivalent circuit constants : Network Analyzer HP8751A or equivalent
- 7-3 Measuring condition : Temperature: +5°C to +35°C  
Humidity: 45% to 85% RH
- If require : Temperature: +25°C ± 3°C  
Humidity: 60% ± 10% RH

7-4 Test circuit

8. Dimensions and recommended soldering pattern

Unit: mm

|            |               |
|------------|---------------|
| Part no.   | : ZTTCR8.00MG |
| Printed on | : 4-Dec-09    |
| Prepared   | : Frankie     |
| Ver. Ctrl. | : 120409/F    |
| Page       | : 4 of 5      |

8. Packing information

8-1 Reel dimension

8-2 Information on tape

8-3 Inner and outer carton box dimension

Each outer box (380x400x330mm) is made of corrugated paper with a thickness of 0.8cm. Each outer box has 12 inner boxes (185x185x95mm) while each inner box has 5 reels (each reel is wrapped with plastic bag).

Quantity of package

Each reel: 3000 pieces of piezoelectric ceramic part

Each inner box: 5 reels

Each out box: 12 inner boxes (180000 pieces of piezoelectric ceramic part)
