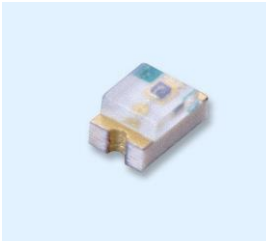
DATASHEET

0805 Package Infrared LED with flat top view lens

HIR17-21C/L289/TR8



Features

.High reliability
.Small double-end package
.Peak wavelength λp=850nm
.Package in 8mm tape on 7” diameter reel
.Low forward voltage
.Pb free
.The product itself will remain within RoHS compliant version.
.Compliance with EU REACH
.Compliance Halogen Free .(Br <900 ppm ,Cl <900 ppm , Br+Cl < 1500 ppm).

Descriptions

.HIR17-21C/L289/TR8 is an infrared emitting diode in miniature SMD package which is molded in a water clear plastic with flat top view lens.
.The device is spectrally matched with silicon photodiode and phototransistor.

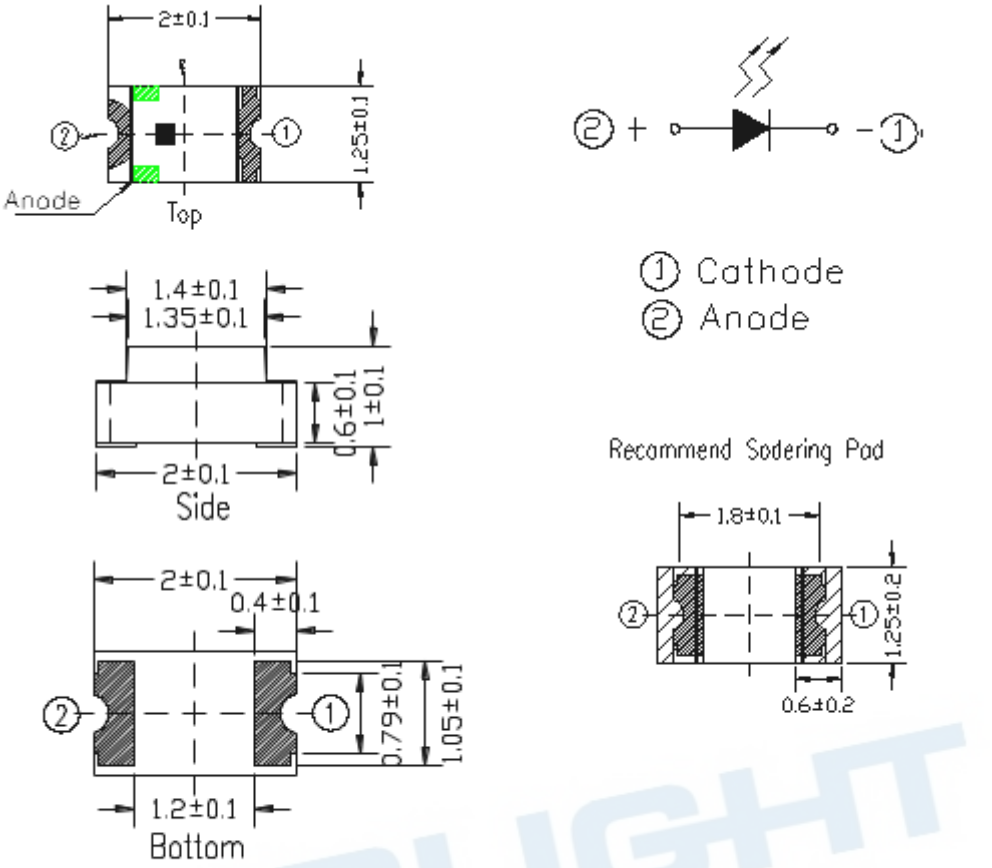
Applications

.PCB mounted infrared sensor
.Infrared remote control units with high power requirement
.Smoke detector
.Infrared applied system

Device Selection Guide

Part Category	Chip Material	Resin Color
HIR17-21C/L289/TR8	AlGaAs	Water Clear

Package Dimensions



Notes: 1.All dimensions are in millimeters
2.Tolerances unless dimensions ±0.1mm
3.Suggested pad dimension is just for reference only
Please modify the pad dimension based on individual need

Absolute Maximum Ratings (Ta=25℃)

Parameter	Symbol	Rating	Unit
Continuous Forward Current	I_F	65	mA
Peak Forward Current *1	I_{FP}	1.0	A
Reverse Voltage	V_R	5	V
Operating Temperature	T_{opr}	-25 ~ +85	°C
Storage Temperature	T_{stg}	-40 ~ +100	°C
Soldering Temperature *2	T_{sol}	260	°C
Power Dissipation at(or below) 25°C Free Air Temperature	P_d	130	mW

Notes:
*1- I_{FP} Conditions: Pulse Width≦100μs and Duty≦1%.
*2- Soldering time≦ 5 seconds.

Electro-Optical Characteristics (Ta=25°C unless specified otherwise)

Parameter	Symbol	Min.	Typ.	Max.	Unit	Condition
Radiant Intensity	I_e	1.6	2.1	--	mW/sr	I_F=20mA
Peak Wavelength	λ_P	--	850	--	nm	I_F=20mA
Spectral Bandwidth	$\Delta\lambda$	--	30	--	nm	I_F=20mA
Forward Voltage	V_F	1.20	1.40	1.70	V	I_F=20mA
Reverse Current	I_R	--	--	10	μA	V_R=5V
View Angle	$2\theta_{1/2}$	--	140	--	deg	I_F=20mA

Radiant Intensity Specifications for Bin Grading

Condition：I_F=20mA
Unit：mW/sr

Bin Number	A	B	C	D
Min	1.60	1.96	2.35	2.74
Max	2.04	2.45	2.85	3.20

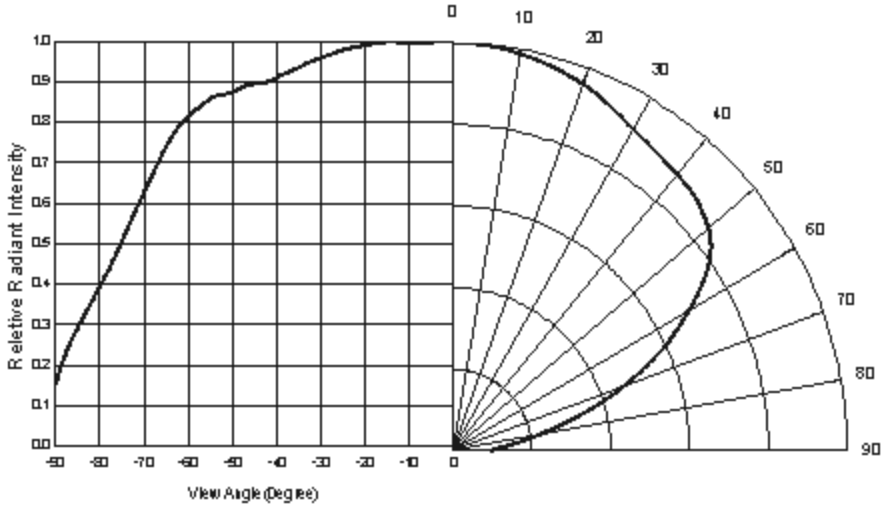
Angular Displacement (Test Condition: I_F=20mA)



Precautions For Use

1. Over-current-proof
   Customer must apply resistors for protection, otherwise slight voltage shift will cause big current change (Burn out will happen).
2. Storage
   2.1 Do not open moisture proof bag before the products are ready to use.
   2.2 Before opening the package, the LEDs should be kept at 10℃~30℃ and 90%RH or less.
   2.3 The LEDs suggested be used within one year.
   2.4 After opening the package, the devices must be stored at 10°C~30°C and ≤ 60%RH, and used within 168 hours (floor life). If unused LEDs remain, it should be stored in moisture proof packages.
   2.5 If the moisture absorbent material (desiccant material) has faded or unopened bag has exceeded the shelf life or devices (out of bag) have exceeded the floor life, baking treatment is required.
   2.6 If baking is required, refer to IPC/JEDEC J-STD-033 for bake procedure or recommend the following conditions:
   96 hours at 60°C ± 5°C and < 5 % RH (reeled/tubed/loose units)
3. Soldering Condition
   3.1 Pb-free solder temperature profile

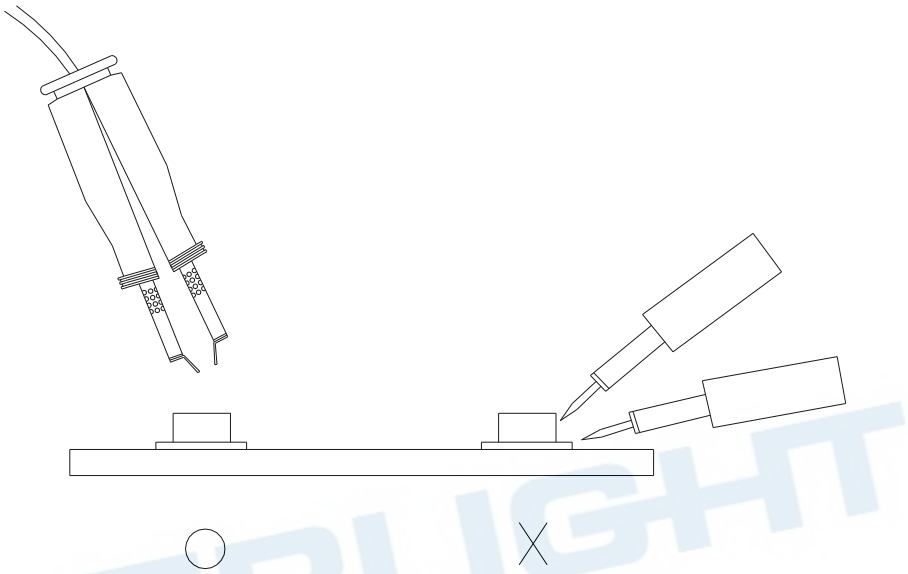
   3.2 Reflow soldering should not be done more than two times.
   3.3 When soldering, do not put stress on the LEDs during heating.
   3.4 After soldering, do not warp the circuit board.

4.Soldering Iron

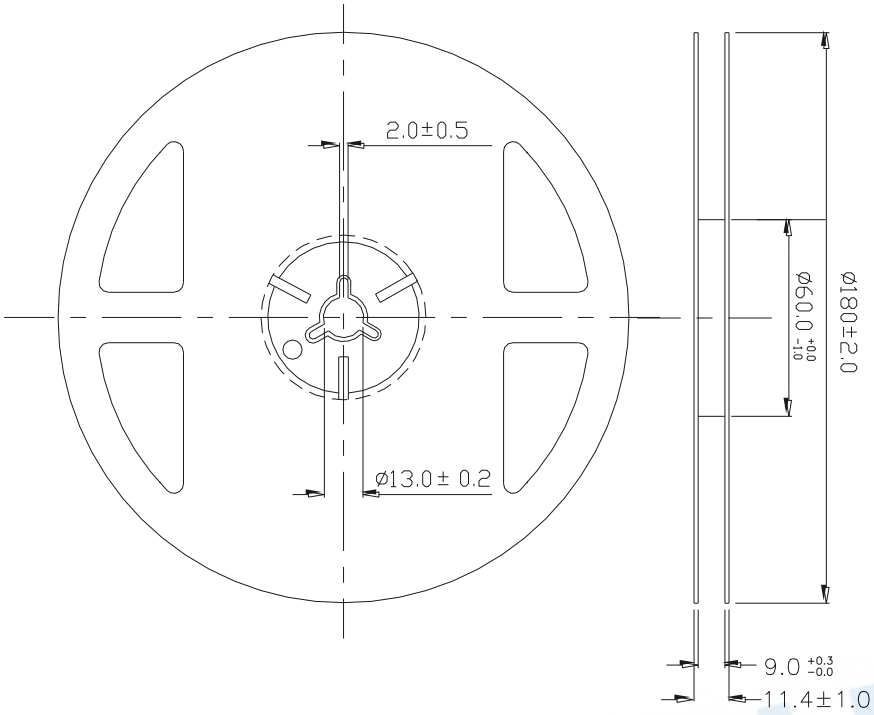
Each terminal is to go to the tip of soldering iron temperature less than 350℃ for 3 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

5.Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.

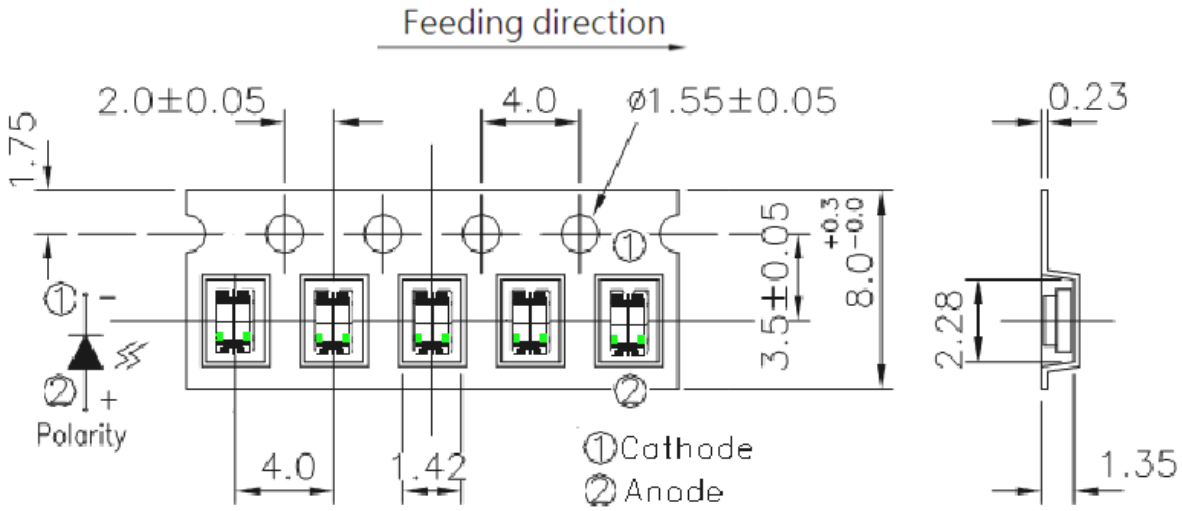


Packing Dimensions



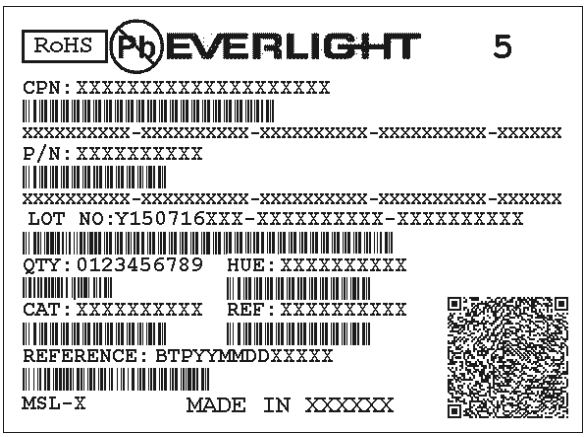
Note: The tolerances unless mentioned is ±0.1mm , Unit = mm

Carrier Tape Dimensions: (Quantity: 4000PCS/Reel)



Note: The tolerances unless mentioned is ±0.1mm , Unit = mm

Label Form Specification



CPN: Customer's Production Number
P/N : Production Number
LOT No: Lot Number
QTY: Packing Quantity
HUE: Peak Wavelength
CAT: Ranks
REF: Reference
MSL-X: MSL Level
Made In: Manufacture place

DISCLAIMER

1. EVERLIGHT reserves the right(s) on the adjustment of product material mix for the specification.
2. The product meets EVERLIGHT published specification for a period of twelve (12) months from date of shipment.
3. The graphs shown in this datasheet are representing typical data only and do not show guaranteed values.
4. When using this product, please observe the absolute maximum ratings and the instructions for using outlined in these specification sheets. EVERLIGHT assumes no responsibility for any damage resulting from the use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.
5. These specification sheets include materials protected under copyright of EVERLIGHT. Reproduction in any form is prohibited without obtaining EVERLIGHT's prior consent.
6. This product is not intended to be used for military, aircraft, automotive, medical, life sustaining or life saving applications or any other application which can result in human injury or death. Please contact authorized Everlight sales agent for special application request.
