

FEATURES

- Universal 90 264VAC or 127 370VDC Input voltage
- Accepts AC or DC input (dual-use of same terminal)
- Operating ambient temperature range: -20℃ to +60℃
- High I/O isolation test voltage up to 4000VAC
- Low ripple & noise
- Output short circuit, over-current, over-voltage, over-temperature protection
- DIN rail TS-35/7.5 or 15 mountable
- Ultra slim design with 36mm width: suitable for small chassis and narrow space installation
- EN62368 safety approved, safety according to UL61010, UL508

LI120-20BxxR2S is Mornsun AC-DC converter series featuring a cost-effective, energy efficient green power supply solution for standard DIN-rail mounting. The products offer a high level of stability and immunity to noise for industrial control equipment, machinery, and other industrial equipment in a variety of harsh environments. These light weight AC-DC converters have an extremely compact design and the standard rail (35mm) installation for space saving. With good EMC performance, compliant with international UL61010, UL508, EN62368 standards for EMC and safety.

Selection Guide							
Certification	Part No.	Output Power (W)	Nominal Output Voltage and Current (Vo/Io)	Output Voltage Adjustable Range (V)	Efficiency at 230VAC (%) Typ.	Max. Capacitive Load (µF)	
	LI120-20B12R2S	120	12V/10A	12-14	85	3000

Note: 1. This power supply does not meet the harmonic current requirements specified in EN61000-3-2, please do not use this power supply under the following conditions:

- (1) The terminal equipment is used in the European Union;
- (2) The terminal equipment is connected to public mains supply with 220VAC or greater rated nominal voltage;
- (3) The power supply is installed in terminal equipment with average or continuous input power greater than 75W.
- 2. The power supply belongs to a part of lighting system. Exception: The power supply used in the following terminal equipment does not need to meet
- (1) Professional equipment with a total rated input power greater than 1000W;
- (2) Symmetrically controlled heating element with a rated power less than or equal to 200W.

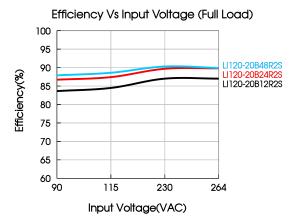

Product Characteristic Curve

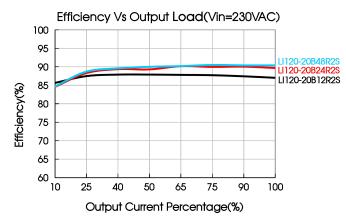

Note: 1.With an AC input voltage between 90-115VAC and a DC input between 127-162VDC the output power must be derated as per the temperature derating curves;

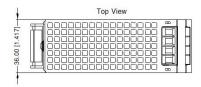

2. This product is suitable for applications using natural air cooling; for applications in closed environment please consult Mornsun FAE.

Unit: mm[inch]

ADJ: Output adjustable resistor Wire range: 26-10 AWG Tightening torque: Max 0.4 N-m

Mounting rail: TS35, rail needs to connect safety ground

General tolerances: $\pm 1.00[\pm 0.039]$

Note:

- 1. For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58220163;
- Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75% RH with 2. nominal input voltage and rated output load;
- 3. All index testing methods in this datasheet are based on our company corporate standards;
- 4. In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability;
- We can provide product customization service, please contact our technicians directly for specific information; 5.
- Products are related to laws and regulations: see "Features" and "EMC"; 6.
- The out case needs to be connected to PE $(\stackrel{\frown}{\oplus})$ of system when the terminal equipment in operating; 7.
- Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units;
- 9. The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with the final equipment. Please consult our FAE for EMC test operation instructions.
