# TFE10201 Series Engineering Specification

#### 1. Scope

This specification is applied to electrostatic discharge (ESD) protection. It is designed to protect the high-speed data lines against ESD transients. It has very low capacitance and fast turn on times makes it ideal for data and transmission lines with high data rates.

According to the special property of device, we recommend not to use on such application as: DC/AC power line.

#### **Feature**

- Protection against ESD voltages and currents (IEC61000-4-2 Level 4)
- Extremely quick response time (<1ns) present ideal ESD protection
- Ultra low capacitance (0.05pF typical)
- Extremely low leakage current
- Bi-directional device
- SMD (Surface Mount Device)
- Zero signal distortion
- MSL Level:Level 1
- Halogen-free
- For RoHS Compliance.

## **Applications**

- Antenna circuit
- USB 3.2 Gen 1 and Gen2
- HDMI 1.3/1.4/2.0
- SATA and eSATA Interface

#### **Product Model**

- Digital Video Equipment
- Mobile Phone
- RF Modules
- GPS Antenna

## 2. Explanation of Part Number

1: TFE: Thin Film ESD Suppressor

2 : Single element3 : Chip size:0201

4 : Max Rated voltage, VDC=6,12,15, 24, 30

5: "B0": Model Code, Pb Free

6: Suffix for Special Code

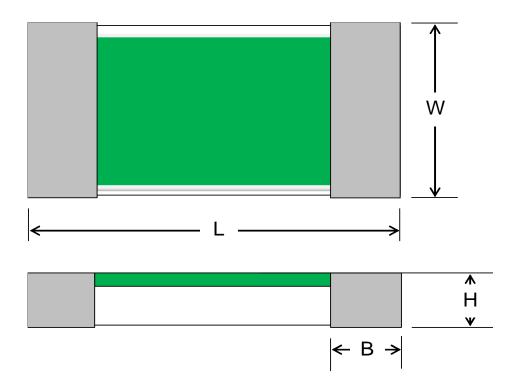

## 3. Circuit Symbol

## 4. Construction & Dimensions

4.1 Substrate : Ceramic (Alumina)4.2. End termination : Ag/Ni/Sn4.3. Construction & Dimension :

Unit: mm

| Chip size | L         | W         | Н        | В          |

## 7.2. Taping reel dimensions

## 7.3. Taping specifications

There shall be the portion having no product in both the head and the end of taping, and there shall be the cover tape in the head of taping.

## 7.4. Label Marking

The label specified as follows shall be put on the side of reel.

- (1) Part No.
- (2) Quantity
- (3) Lot No.
- \* Part No. And Quantity shall be marked on outer packaging.

## 7.5. Quantity of products in the taping package

- (1) Standard quantity:
  - 15000pcs/Reel for TFE10201
- (2) Shipping quantity is a multiple of standard quantity.

## 8. Precautions for Handling

#### 8.1. Solder cream in reflow soldering

Refer to the recommendable land pattern as printing mask pattern for solder cream.

(1) Print solder in a thickness of 0.10 to 0.15 mm.

Unit: mm

| А | 0.35±0.05 |
|---|-----------|
| В | 0.27±0.05 |
| С | 0.5±0.05  |

## 8.2. Precaution for handling of substrate

Do not exceed to bend the board after soldering this product extremely. (reference examples)

- Mounting place must be as far as possible from the position, which is close to the break line of board, or on the line of large holes of board.
- Do not bend extremely the board, in mounting another components.
   If necessary, use back-up pin (support pin) to prevent from bending extremely.
- Do not break the board by hand. We recommend to use the machine or the jig to break it.

## 8.3. Precaution for soldering

Note that this product will be easily damaged by rapid heating, rapid cooling or local heating.

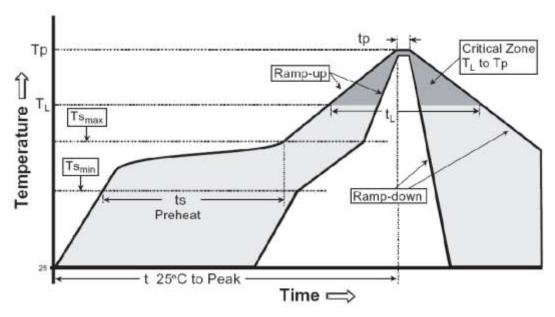

Do not give heat shock over 100°C in the process of soldering. We recommend to take preheating and gradual cooling.

**DOCUMENT NO. ENS000159550** 

SPEC REV.: A2 Page 9 of 10

#### 8.5. Soldering gun procedure

Note the follows, in case of using solder gun for replacement.

- (1) The tip temperature must be less than 280°C for the period within 3 seconds by using soldering gun under 30 W.
- (2) The soldering gun tip shall not touch this product directly.

## 8.6. Soldering volume

Note that excess of soldering volume will easily get crack the body of this product.

## 8.7. Taping Package Storage Condition

Storage Temperature : 5 to 40  $\,^{\circ}\mathrm{C}$ 

Relative Humidity : < 65%RH Storage Time : 12 months max
