

# uP Keyfob with Keeloq Coding

TX-uP/LP Keyfob must be used in pair with RX-uP/LP Receiver, furthermore thanks to the Keeloq\* alghoritm it ensures an high level safety.

The low battery level signalization is carried out through an Led (Look to the battery substitution character).

### Types available

TX-2M-uP/LP: 2 buttons Keyfob TX-4M-uP/LP: 4 buttons Keyfob

### **Technical Specification**

	Min	Typical	Max	Unit
Reception Frequency	433.82	433.92	434.02	MHz
Effective Radiated Power		0.5	1.0	mW
Modulation		OOK		On-Off Keying
Power supply (CR2032)	2.2	3	3.3	V
Current consumption in Tx		10	15	mA
Current consumption in stand-by	1.0	2.0	3.0	uA
Battery life		3 ( <b>1</b> )	5	years
Serial identification Code length	28			bit
Hopping Code Length	32			bit
Combination possible	2 <u>32</u>			
Working Temperature	-10		+55	°C
Dimensions	75 x 40 x 16			mm

<sup>1: 70</sup> sec per day as average timing transmission (14 transmission of 5 sec/each).

## **Battery Substitution**

When the LED starts blinking, it is necessary to replace the battery power.

Then consequently, remove the top part of the plastic case of the remote control.

Using a screwdriver, remove the screw on the back of the container, open the two plastic cases leveraging the part that has an opening; remove the PCB cards from the housing being careful not to damage it.

The technical features can change without forecasting. AUR°EL S.p.A doesn't assume any responsability of demage due to the improper use of the device.

<sup>\*</sup> Keelog is a Microchip trademark

Remove the old battery and replace with the same type (model CR2032 3V Lithium), taking care not to reverse the polarity [see picture]. Replace the electronics in plastic bottom, join the two plastic cases so that they fit and finally insert the screw.

If the battery has leaks of liquid, remove it immediately and clean the battery taking care not to come into contact with these substances; Wash your hands thoroughly after this operation.

Please do not release into the environment the old battery and dispose it in appropriate containers in order to facilitate disposal.

#### **Normative**

I TX-2M-uP/LP **and** TX-4M-uP/LP Keyfobs are compliant with **EN 300 220, EN 301 489** and **EN 60950** European Normative.

The technical features can change without forecasting. AUR°EL S.p.A doesn't assume any responsability of demage due to the improper use of the device.
